

Figure 5.8 Example of a cold front, occurring on 26 November 2015 over part of the USA. The front lies along the boundary between the warm air to the southeast (orange shading), and the cold air to the northwest (blue shading). The 2 m wind speeds and directions are shown by the arrows. Data source: ECMWF Interim Reanalysis, for 1981 – 2010 (Dee et al. 2011).
